

OCET Update  
April 2015

- A non-credit "Meat Cutting" training program is included in the C3T1 grant. The College will be using retrofit funds for an electrical upgrade in the HawCC cafeteria for meat cutting and processing equipment. The electrical modifications will be done the second half of May so training can begin in early June.
- OCET is working with the transportation industry to develop a Commercial Drivers License (CDL) training program on the campus for individuals seeking truck driver positions. This program is based on Leeward CC's successful program and will prepare individuals for the Type A CDL license. Trucking companies will assist the College in providing instructors and trucks for the hands-on portion of the training. The target date is Spring 2016.
- Watch for the newest May-August OCET brochure coming out soon either on-line or at the OCET office.
